

Forms Blast

**Collect missing patient information—
automatically, digitally, at scale.**

Forms Blast is RevSpring's automated digital forms solution that captures missing patient information through automated omnichannel outreach. Dynamic forms adapt to each patient's responses, and AI-powered OCR captures information directly off ID cards and insurance cards—reducing manual follow-up, improving data accuracy, and accelerating financial and operational workflows across the care journey.

Benefits

Reduce manual phone follow-up

Automated digital outreach replaces staff-intensive callback work.

Improve data accuracy

Capture clean information before scheduling, billing, or claims.

Accelerate financial clearance

Resolve eligibility and COB gaps faster with digital campaigns.

Increase patient response rates

Digital-first omnichannel outreach drives higher completion rates.

Free staff for high-value work

Automation handles follow-up so teams focus on exceptions only.

Support any use case

COB, financial assistance, accident reporting, eligibility, and more.

Outcomes

35%+

of forms completed

form completion rate using digital outreach only

40%+

cost reduction

lower print and postage costs

"Forms are completed within 2 days of sending a digital message, with over 35% completion rate—without any manual outreach from staff."

– RevSpring Forms Blast Performance Benchmarks

Features

Automated digital forms campaigns

SMS, email, and print fallback—managed end-to-end automatically.

Dynamic logic-driven forms

Conditional questions adapt based on each patient's prior responses.

AI-powered OCR capture

Scans and extracts insurance cards, IDs, and documents instantly.

Pre-population and autosave

Known data pre-filled; progress saved so patients can resume anytime.

eSignature capture

Securely collects patient authorization within the digital workflow.

Reporting and daily return files

Tracks completion rates and delivers structured data back to systems.

Integration Snapshot

Forms Blast uses RevSpring messaging infrastructure and is triggered by scheduled engagement files – flat file or API. Integrates with any EHR or PM system. Works across preservice, point-of-service, and post-care workflows including COB, financial assistance, accident questionnaires, and eligibility updates. HIPAA-compliant secure portal throughout.
