

Untether with Deviceless Payments™

Cut the Cord on High Costs and Health Risks

What?

Deviceless Payments™ allow call center and point-of-service personnel to securely **take payments without a card terminal**.

Deviceless Payments are:

- ✓ PCI-compliant
- ✓ Contactless
- ✓ Flexible
- ✓ Cost effective for providers
- ✓ Sanitary

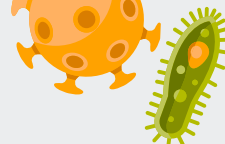

Why?

With more staff members working remotely, the **risk of fraud increases**.

Patient credit card numbers and banking information **easily can be overheard** in an employee's home environment.

There are risks at the point-of-service, including public and staff **exposure to deadly germs**.

By cutting the cord on payment devices, providers can eliminate:

Who?

Providers and patients both benefit from cutting the cord on deviceless payments.

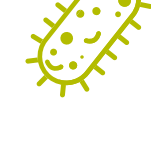

PROVIDERS

Reduce PCI compliance & fraud risk

Save substantially on capital & operating expenses

Protect employees & patients from unnecessary germ exposure

PATIENTS

Patients who **want to pay** a healthcare bill

can do so **quickly, safely & securely**

no matter if they're interacting with **CSR or POS personnel**

How?

1

EASY

Provider personnel sends an encrypted link via text or email or a soft transfer to an IVR.

2

SIMPLE

Patient clicks on the encrypted link on personal smart device or listens for prompts in the IVR.

3

SAFE

Patient securely enters credit/debit card or ACH information without ever exposing private credit card or banking information.

Where?

3 Deviceless Payment Options

PRE-SERVICE

POINT-OF-SERVICE

VIRTUALLY ANYWHERE

As part of **appointment reminders** and other pre-service interactions.

During check-ins for **clinic appointments** or after planned and emergency services at a **hospital**.

CSRs can securely connect patients to a system for safe financial data entry **via their smart device** from virtually anywhere.

Cut the Cord on Traditional Patient Payment Methods and Reap Substantial Savings

As your health system grows, so do your savings!

Cost Savings Up to \$250K

Under 150 beds

Cost Savings Up to \$500K

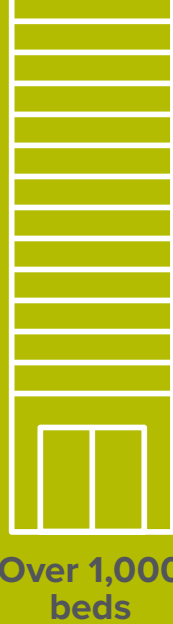

151-500 beds

Cost Savings Up to \$1M

501-1,000 beds
